

# WRAPPING USER GUIDE

Premeer is a product of Interprint

# Premeer® Product Description

#### Premeer is printed and coated oriented polypropylene film (OPP)

- OPP basis weights: 32 and 56 gsm
- OPP thickness: 1.2 and 2.0 mils before coating Coating will add 0.3 to 0.7 mils depending on surface properties desired.
- Premeer Product Grades: Good, Better and Best quality
- Printing Process: Rotogravure, 4 units; water-based organic pigments, excellent light stability, No VOCs
- Coating Process: In-line roll coater, polymerized by Electronic Beam (EB)
   Coating is a blend of oligomer and monomer acrylate polymers.

   Functional additives are available to enhance surface characteristics upon request.
- Premeer is sold in roll form ready for lamination:

Width: 127 cm/50 in. and 157 cm/62 in. (custom dimension available on request)

Roll diameter: 56 cm/22 in. (custom dimension available on request)

Length per roll: 4800 LM (32 gsm) 3000 LM (56 gsm) Core diameter: 15 cm/6 in. diameter

- Packaging: 4 individually wapped rolls per shipping skid stacked in a suspended mode (2 rolls on 2 rolls)
- Handling/Storage: Standard lift truck with long fork, dry storing conditions: 10° 30° C
- Approved waste disposal: Incineration for power generation or regular landfill

## Wrapping Parameters

- Wrapping lines, straight/simple application: Vorwood (with EVA glue)
- Wrapping lines, curved/complex application: Barbaran, Fitz (with PUR hot melt glue)
- Glues: Liquid EVA (PA 310 by H.B. Fuller) PUR hot melt glue (Helmitin, Kleiberit)

### Post Lamination Machining

- Sawing: Rip saw (Homag, Holtzer, Gibben) with scoring saw
- Blades: Use same type of blades as foil paper (Gladu Super Plus Saw Blade)

  Note: It is a different saw blade then for melamine as it runs cooler, cleaner with no chipping
- CNC/Drilling: For a cleaner cut without chipping, a double helix design tool bit is recommended (Gladu compression bits)
