

PREMEER vs. FOIL PAPER

COMPARISON

Premeer is manufactured with an e-beam cured topcoat for superior performance and increased benefits:

Premeer Performance & Benefit

- Higher scratch/abrasion resistance Reduced rejects/claims
- Higher moisture resistance Reduced rejects/claims
- Better boiling water/steam resistance Reduced claims
- Better resistance to stain, easier to clean Reduced rejects/claims
- Better print fidelity Increased customer appeal

Premeer Flat Lamination

- Uses wet laminator/EVA glue
- Laminates to PB/MDF/plywood/gypsum.
- Does not break during lamination
- Does not need primer on back
- Can be mechanically embossed
- Extended shelf life with open roll.
- Can be used for V groove

Foil Paper Lamination

- Uses wet laminator/PVA glue
- Laminates to PB/MDF/plywood/gypsum
- Breaks during lamination
- Does not need primer on back
- Cannot be mechanically embossed
- Limited shelf life when roll opened
- Cannot be used for V groove

Premeer Moldings

- Uses Barbaran/Homag/other wrapping lines
- Uses PUR hot melt glue, no paper backer
- Uses PEO hot melt glue, no paper backer

Foil Paper Moldings

- Uses Barbaran/Homag/other wrapping lines
- Uses PUR glue
- Uses PEO glue

Premeer & the Environment

- Formaldehyde free
- Printed with water base inks only

Foil Paper & the Environment

- Might emit formaldehyde from paper
- Can be printed with solvent & water inks

Premeer Fire Rating ASTM E84/UL723

- Class A, best rating for flame spread/smoke

Foil Paper Fire Rating

- Does not meet fire rating requirement
